_____ OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

EXHIBIT "A"

Lyon County is owner of Permits 58294, 58295, 58296, 58297 & 58298. All five of these permits were issued to serve the Mark Twain Estates and Daytona Heights Subdivisions by means of the Dayton Utilities water system that connect these two subdivisions. These two subdivisions have a total combined build-out of 498 single family units along with a 20 acre park site. This water system presently serves 439 residential hookups. It is anticipated that the complete build-out of the subdivision will occur within two to four years. These permits will also be utilized in the construction and maintenance of the 20 acre park. All permits servicing the two subdivisions have been commingled together.

The well under permit 58294 (Daytona Heights #1) is currently not operated because of water quality problems. The intent of this application is to transfer a portion of permit 58294 into the well under permit 58298 in order to ensure that beneficial use can be established and to account for the water being pumped from the latter well.

The total combined duty of Permits 58294, 58295, 58296, 58297, 58298 & this application is not to exceed 557.83 acre-feet annually.

For existing point of diversion, refer to map on file under permit 34292 for proposed point of diversion, refer to map filed under permit 43084. For existing and proposed place of use, refer to map filed under permit 58294.
